

## POWER INDUCTORS

### SHIELDED MAGNETIC RESIN INDUCTORS

Our magnetic resin inductors are available in several package sizes and families, all in compact form factors ranging from 2x2 to 8x8 mm footprints and heights ranging from 1.0 to 4.2 mm tall. A simple construction consisting of a drum core coated with a magnetic resin for shielding allows for minimal materials and efficient manufacturing that results in a low cost inductor suitable for a wide array of applications. The combination of small footprint, wide temperature range (-40 to 125C), soft saturation, and cost-effective design make these inductors ideal for low to mid-current range DC-DC converters in the Computing, Communications, Industrial, and Handheld/Wearable industries.

## FEATURES & BENEFITS

- Low Profile (1.0 to 3.2mm)
- Small footprint (2x2 to 8x8mm)
- Magnetically Shielded
- Soft saturation characteristics
- Industry Standard Footprints
- Computing, Communications, Industrial, and Handheld Applications
- Excellent temperature stability
- Handles transient current spikes without saturation
- Suitable for High Frequency Applications

## Other Great Products from Pulse Electronics

### Power Inductors

- Power Bead, Molded, Composite, Drum Core and Toroid Constructions
- Over 100Apk

### Switch Mode Transformers

- Multiple Topologies
- Up to 2kW
- Functional, Basic and Reinforced Insulation

### Isolation Transformers

- Push-pull, Flyback and H-Bridge topologies
- Functional, Basic and Reinforced Insulation
- Up to 5kVrms Hi-pot\*

### Current Sense Magnetics

- Functional, Basic and Reinforced Insulation
- Up to 40Arms

### Common Mode Chokes

- NiZn, MnZn and Nanocrystalline Materials
- Up to 45Arms

Surface Mount and Through-hole Terminations • Catalog and Custom Solutions Available
