FOCUS MARKETS & APPLICATIONS

Pulse Electronics is developing the next generation of networking components to support the future expansion of the following markets and applications. Pulse has full line of network products which include Discrete Ethernet Magnetics, Integrated Connector Modules, Connectors, RF Inductors, Common Mode Chip Chokes, and Telecom Magnetics and Filters.

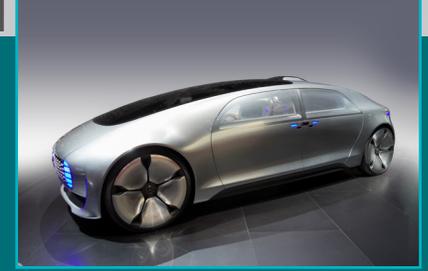

INDUSTRIAL MARKET

Applications

- Automation
- Process Controls
- Communications
- Robot controls
- Security Displays
- Smart Grid

TRANSPORTATION

Applications

- Infotainment
- Body Controls
- ADAS
- Cameras
- Battery Management Systems

COMMUNICATIONS

Applications

- Switches
- Routers
- Gateways
- Access points
- Basestations

CONSUMER

Applications

- ONT
- Femtocell
- Gateway/Router
- Security
- Home Automation
- Displays/TV

MEDICAL

Applications

- In Fusion Pumps
- Imaging
- Ventilators
- Diagnostics
- Monitors
