

STATEMENT
GHG EMISSIONS REDUCTION

May 2023

As a leading global supplier of electronic components, YAGEO Group is committed to conducting business in a manner designed to protect the health and safety of our employees, our customers, the public, and the environment. Further, we are committed to the protection of people and the environment in a sustainable manner to prevent climate change and maintain biodiversity and ecosystems.

As we integrate our global manufacturing operations, we are implementing the collection of emissions data within a unified sustainability platform. This consolidated data will support the establishment of informed Scope 1 and Scope 2 emissions reduction targets necessary to achieve net zero emissions by 2050. Our reduction roadmap will be developed using Science Based Targets initiative (SBTi) or similar decarbonization method by the end of 2024.
